Subject: PG&E Safety Alert: Planned Public Safety Power Shutoff (Message sent on October 8th)

Dear Critical Service Provider,

To protect public safety, PG&E may turn off your power overnight. Power will remain off until weather conditions improve and it is safe to restore service. We have been reaching out to customers asking that they prepare emergency plans and supplies. To view a list of your impacted locations visit pgepsps.com.

Here is what you need to know:

- Power will remain off until weather conditions improve and it is safe to restore service
- We will continue to keep you updated
- In most cases, we would expect to be able to restore power within 24 to 48 hours after weather has passed
- However, depending on weather conditions or if any repairs are needed, outages (weather event plus restoration time) could last longer than 48 hours
- For planning purposes, we suggest preparing for multiple-day outages
- If you see a downed power line, assume it is energized and extremely dangerous and call 911 immediately
- Maps of impacted areas are also available for download at pge.com/pspsseventmaps

For more information visit pge.com or call 1-800-743-5002.

Thank you,

Pacific Gas and Electric Company
