Security

We protect your personal and financial information by using a secure website for processing your online orders. When you are checking out, you should see a closed lock icon  somewhere in your browser window, beginning on the first page in which you enter personal information. This indicates that the connection between your browser and the remote computer is encrypted. Any information sent over this encrypted connection is incomprehensible to anyone who intercepts it.

The location of the lock icon varies depending on your browser and the version of the browser you are using. Look in the bottom corners or near the top of the browser window. You should never enter personal or financial information on any website that does not display this icon. Please remember that on our website you may not see this symbol until the first page in which you actually enter personal information (on step 2 of the checkout process).
