Dear BOE,

This is America. When it's time for public comment, you don't arbitrarily pick 7 speakers to meet a 20 minute timeline. You listen to all public comments. Please never again cut short our first amendment.

The BOE isn't hearing the community. Please hear this public comment: there were many students lost because of the negative perception of DJUSD in getting back to school. How this was suggested to have not been the case is questionable.

And final public comment to all listening: remember the way to make change is by vote. If you're unhappy with the current performance you can change things in 2022.

Respectfully sent,  
Jeremy Taylor

This concerns the [VII.d. New Public Comment Process Demonstration](#)  
Rationale agenda item.

**Public Comment:**

Dear DJUSD Board of Education trustees. I thank you for allowing me to make my public comments and for staying strong during these trying times. Even though its reached new heights. I rather like the restless nights. It makes me wonder, makes me think. There's more to this, I'm on the brink. It's not the fear of what's beyond. It's just that I might not respond. I have an interest, almost craving. But would I like to get too far in?

Thank you again for your time and making these hard decisions.

Please reconsider your plan to prioritize comments by first come first serve. I do not have the time or money, like many of the organizations in Davis, to flood the inbox as soon as it's open for public comment. I can see people and organizations gaming the system to ensure only their opinion is heard.

I disagree with a lot of public comments but I do appreciate hearing perspectives that differ from my own.
