Definitions:

Class Meeting (All) - This 30 minute all-classmeeting is SEL focused, including in-person and Distance Learning students and will be scheduled during the 8:30-11:30 block. Meeting will focus on class connection, framing work for the day, morning calendar time, and class meetings.

In-person Learning- Students participate in-person in school-based activities four (4) days a week. In-person students will have 50-60 minutes of asynchronous learning during these days to meet minimum instructional minute guidelines of 230 minutes (Grades 1-3) and 240 minutes (Grades 4-6) per SB 98.

Distance Learning - The Distance Learning block is dedicated to the instructional needs of Distance Learning students. Distance Learning students will have an additional 80-90 minutes of asynchronous learning during the day to meet the minimum instructional minute guidelines of 230 minutes (Grades 1-3) and 240 minutes (Grades 4-6) per SB 98.

Teacher Collaboration, Staff Meeting and Preparation Time - Wednesday from 12:15 p.m. to 3:30 p.m. is designated for contractual teacher preparation time (in addition to daily preparation time), collaboration and staff meetings.

Model Features:

Meals and cleaning - Meals will be available for students at the end of each day and will include a lunch and breakfast for the next day. Meals will also be available for pick up for Distance Learners and groups not on campus. Custodial staff will clean and disinfect each room at the end of each day.

Special Subjects

Special subjects (Library, Music, Intermediate Science) are scheduled during a combination of in-person and at-home hours. Instruction will be delivered through a combination of in-person instruction, virtual synchronous, and asynchronous instruction. Push-in Special Education services will be scheduled to be provided to students during their in-person time and pull-out Special Education services will be scheduled to be provided outside the in-person time as much as possible. Schedules for these subjects will vary by site and grade level. Intermediate Science teachers will provide in-person instruction. To accommodate health and safety guidelines maintaining consistent cohorts, teachers will need to push into the main classroom for instruction or have one (1) cohort of students per day attend class in the designated science room.

Special Education and Academic Supports

Special Education (SPED) and academic supports will be delivered throughout the day. Note: SPED intervention times need to be prioritized over other services to ensure required goals and learning objectives are met. Push-in Special Education services will be scheduled to be provided to students during their in-person time and pull-out Special Education services will be scheduled to be provided outside the in-person time as much as possible. Schedules will vary by site. Distance Learners will continue to receive services and support virtually as scheduled by their case manager.

English Learner Services and Interventions

English Language Development is a state mandated subject and will be delivered in small groups throughout the day according to student language proficiency. Special services and interventions will be prioritized based on student need. In order to limit the mixing of groups and to minimize contact between students from different classrooms as much as possible, EL services will continue virtually until further notice.

Distance Learning Only Option

Students who choose to participate via Distance Learning will receive instruction from their current assigned teachers in the following modes:

- Participation in a daily, all-class, synchronous meeting in the morning
- Dedicated, synchronous virtual small group instruction in the afternoon four days per week and Wednesday mornings
- Asynchronous lessons, activities, and assignments as determined by the teacher

Student Transitions between In-person and Distance Learning

Students will be allowed to transition to In-person learning once per week on Mondays. Requests for transition can be made Monday through Thursday. Students may transition to Distance Learning at any time.

Health and Wellness

Each site will organize movement/recess breaks during in-person time on campus. These movement breaks will be staggered by classroom. Social Emotional Learning (SEL) will continue to be embedded in

both synchronous and in-person classroom instruction.

Instructional Minutes

The daily minimum for total instructional minutes (including synchronous and asynchronous instruction) required in a Modified In-person model are consistent with expectations outlined in Senate Bill 98 (SB98). SB98 also requires a “daily live check-in” with all students.

Teacher Preparation

This is non-student time for teachers to prepare for their daily lessons. Teachers have 75 minutes per day for teacher preparation for a total 375 minutes per week.
