INOFAB MODULAR

As a leader in the fabric structure industry InoFab Modular provides distinctive shade solutions for communities nationwide. Through years of research and development InoFab Modular offers an assortment of pre-engineered shade structures that provide extensive sun protection while creating distinctively appealing architecture. Our modular structures are designed for year-round performance with minimal maintenance. This commitment to superior products coupled with unrivaled after sales service has distinguished our structures as the vendor of choice for many cities throughout the country.

Through a dedicated team of fabric structure professionals we are proud to offer diverse and exceptionally safe structures. In addition to modular units our parent company, SHS, Inc., offers comprehensive design/build services to manage your entire project. As a result we are able to offer extensive warranties on both the product and construction of your structure. Our modular fabric structures are fabricated according to strict quality control standards as we endeavor to provide safe protection for the community for years to come.

ENVIRONMENTAL AWARENESS

In an effort to contribute to environmental awareness and responsibility, Southern Hemisphere Shades Inc. is establishing new industry responsibility standards through the efforts of our own in-house Environmental Impact Research. With specific credentials in Bio Chemistry and Environmental Science we are able to constantly monitor our compliance with the EPA standards. With published papers in the field of Endocrine Disruptors and the role plastic products might play, we are constantly updating our industry's product value systems to ensure maximum community health & comfort combined with long term safety.

We believe Southern Hemisphere Shades Inc. is an industry leader in this field.

PRODUCT RECYCLING

All of our HDPE and PVC product lines are 100% recyclable. Excess waste, including fabric and steel, is recycled by SHS, Inc.
