**REASON/S FOR TITLE CHANGE**

As we move to develop the Pathway for Culinary Arts, a developmental sequence of courses must be in place to move students from introductory level to certificate for entry job skills. The new text, *Food for Today*, is an excellent resource for the introductory class. It is supplemented by ServSafe materials and a variety of project based learning activities. This first year will prepare students to move into the planned Culinary I for second year and Culinary II for the capstone course and internship activities.

These changes are aligned with Pathway guidelines and are more in depth than the prior class format.
